

MEGACOAT CERMET SALE

Superior Performance at a Stable Price

| PV7025: Wear-resistant Carbide Replacement for General Steel Applications

| PV7010: For Finishing in Steel Applications

| PV7005: For Finishing in Cast Iron Applications

With the ever-increasing cost of Tungsten Carbide, today's informed consumers are switching to Kyocera's MEGACOAT cermets to provide cost-effective solutions for roughing to finishing turning applications. Use our low price introductory offer to discover how Kyocera's high-performance, new technology cermets can lower your tooling costs.

To receive a **FREE** sample of Kyocera's new MEGACOAT Cermet, please scan the code above. Or if you prefer, visit: <http://americas.kyocera.com/kicc/samples>
